Education

B.S. Computer Science *Clemson University*

08/24 – 05/28

Research

Machine Learning Researcher *Clemson University Creative Inquiry*

Spring 2026

- Developed and evaluated machine learning models for automated detection of predatory journals.
- Built and evaluated an automated classification pipeline using neural networks and open-source LLMs.
- Presented findings at the 21st Annual Focus on Creative Inquiry Forum and Clemson AI Research Symposium.

Tech Stack Python, PyTorch, Machine Learning, LLMs, Qwen, Llama, Classification

Projects

Yuzic *Open Source Mobile App*

12/24 – Present

github.com/eftpmc/yuzic

- Built a cross-platform open-source music player for self-hosted media servers.
- Implemented offline playback, multi-server support, and music discovery.
- Designed a modular architecture supporting multiple self-hosted music server backends.

Tech Stack React Native, TypeScript, Expo, Redux, Express, Jellyfin API, Subsonic API

Reddibase *ML Answer-Extraction Pipeline*

2026

github.com/eftpmc/reddibase

- Built a source-neutral pipeline that turns Reddit discussion threads into structured answer-extraction datasets.
- Trained a resolved-thread classifier and semantic identifier backed by a FAISS vector index.

Tech Stack Python, PyTorch, SentenceTransformers, FAISS, FastAPI, Reddit API

Experience

Freelance Software Developer *Various Clients*

04/22 – Present

- Built websites for Lowcountry Chorale in Lady's Island and a Hilton Head parking enforcement company.
- Delivered responsive layouts, contact forms, and deployment handoff for local clients.

Tech Stack React, Next.js, Node.js, TypeScript, TailwindCSS, WordPress

Junior Developer *Atlas Studios*

10/22 – 06/23

- Developed object-oriented gameplay systems in Lua.
- Built gameplay mechanics and UI features alongside a multidisciplinary development team.
- Contributed to a game serving more than 10,000 players.

Tech Stack Lua, Object-Oriented Programming, Roblox Studio

Technical Skills

- **Languages:** Python, C++, C, Go, Java, JavaScript, TypeScript, Lua, Dart
- **Frameworks:** React, React Native, Next.js, Node.js, Express, PyTorch, Expo, TailwindCSS
- **Tools:** Docker, Git, Linux, MongoDB, MySQL, Redis, SQLite, Firebase, Supabase, Vercel, FAISS
